

## RESEARCH DATA MANAGEMENT AND SHARING

*2 hours / online*

**6 November | 11h00 – 13h00**

This seminar aims to provide PhD students at the University of Minho with a broad and functional understanding of the essential components for ensuring good open science practices in the field of research data management and openness. The objective is to raise awareness of good data management practices, institutional policies, the requirements of science funders, and the services that facilitate the implementation of open and responsible research practices with a focus on data sharing.

### Contents

- Research data management and openness: introduction to the concepts and requirements of science funders
- Planning, organizing, storing and documenting: best practices for data management
- Research data sharing: where to publish datasets
- DataRepositóriUM: institutional repository service for sharing, publishing, and managing research data

### Speakers:

Pedro Príncipe, André Vieira and Paula Moura

Scientific Information, Repositories and Open Science Office - Documentation and Library Services (USDB)
